

Ultra Digital[®] Silver Foil Board

You can finally create high-impact metallic effects on your HP Indigo press – without added costs or having to use special inks.

Ultra Digital[®] Silver Foil Board offers a super smooth, transfer metallized surface in a bright, glossy silver finish, and it is RIT certified for flawless image reproduction. Available in a C1S for imaging on the silver side only and C2S for printing on both sides (silver and white). Now you can use your ElectroInks to create metallic effects in any color, and with white ink technology, the sky's the limit for creative special effects. Make the chrome in automotive or industrial promotions pop, give life to ordinary greeting cards, or create a shimmering palette of color in beauty product packaging.

This sheet gives you the ability to print short run metallic effects, that look like foil stamping, to give your brand message added dimension, value and the competitive advantage.

Description	Sheet Size	GSM	Caliper	Packaging
10 pt. C1S Silver Foil Board	18 x 12	218	0.0100	100/package 400/carton
12 pt. C2S Silver Foil Board	18 x 12	280	0.0120	100/package 400/carton

FEATURES

- Smooth, uniform surface
- Compatible with white ink for creating special effects
- Gives you the metallic look without metallic inks
- Acid free
- pH neutral
- Recyclable

APPLICATIONS

This sheet is excellent for creating packaging, tags, invitations, greeting cards, certificates, menus, business cards, membership cards, catalog covers, and tickets, among many other possibilities.

FINISHING

Ultra Digital[®] C1S & C2S Silver Foil Board is suitable for a variety of finishing processes including laminating, die cutting, scoring, gluing, folding, UV coating, embossing and debossing.

Clear coating this sheet helps reduce the appearance of fingerprints and other blemishes that are inherent with a highly reflective surface.

Please note that foil products require special care when guillotine cutting.

CERTIFICATION

This sheet is RIT and HP Indigo certified for flawless performance on HP Indigo presses.
